

Redacted King Arthur Community Incident Ledger

Community reports compiled through Aug. 3, 2026

Important: These are resident or witness reports, not City, police, insurance, engineering, or medical findings. Dates and years with obvious typographical errors in the source were normalized to 2026. Names, private contact channels, vehicle identifiers, and home-level information were removed. Original row 7 was omitted because it only showed police near a stopped white car and did not explain the event.
